Dear Mr. Radford:

CSS Environmental Services, Inc. (CSS) is pleased to submit the Second Semi-Annual 2005 Groundwater Monitoring Report for the property located at 5531 State Farm Drive, Rohnert Park, California.

If you have questions or comments, please call me at (415) 883-6203.

Sincerely,
CSS ENVIRONMENTAL SERVICES, INC.

Terrance E. Carter, REA
Senior Project Manager

- Chain of Custody Documentation

1.0 INTRODUCTION

CSS Environmental Services, Inc. (CSS) is pleased to present the second semi-annual 2005 groundwater monitoring activities to the County of Sonoma Department of Health Services – Environmental Health Division (SCEHD). The site is located at 5531 State Farm Drive, Rohnert Park, California. The regional location of the facility is presented on Figure 1. Figure 2 presents features including the locations of permanent groundwater monitoring wells and the location of the former 500-gallon capacity gasoline underground fuel storage tank (UST).

1.1 Summary of Activities – Second Semi-Annual 2005

The following activities were performed at the site during the second semi-annual, 2005:

- Groundwater elevation measurements and routine groundwater monitoring samples were collected from select site monitoring wells on September 23, 2005 according to CSS's SCEHD-approved sampling schedule (March 9, 2005). Groundwater sample laboratory analytical results of samples collected on September 23, 2005 for petroleum hydrocarbons are presented in Table 1 and Figure 4. Groundwater elevation measurements taken on September 23, 2005 are shown in Table 2 and Figure 3. The laboratory analytical reports are provided in Appendix A.
- In accordance with AB 2886, CSS has completed electronic reporting of the groundwater sample analytical results and required well information for this semi-annual groundwater monitoring event.

2.0 GROUNDWATER MONITORING – SECOND SEMI-ANNUAL 2005

2.1 Groundwater Elevation Monitoring

Depths to groundwater for all wells LP-1 through LP-8 were measured on September 23, 2005 and are presented in Table 2. Groundwater elevation contours, calculated using groundwater depths measured on September 23, 2005 are presented on Figure 3. Based on this data, the approximate direction of groundwater flow is to the south-southwest, at a shallow gradient of 0.003 feet per feet (ft/ft).

2.2 Groundwater Sample Collection and Handling Protocol

Groundwater samples were collected from all the monitoring wells, LP-1 through LP-8 during the second semi-annual event of 2005. The groundwater samples collected from site monitoring wells were analyzed for TPH-D using U.S. Environmental Protection Agency (EPA) Method 8015MOD; and TPH-G, BTEX, and MTBE using EPA Method 8260B. The results for these samples are provided in Table 1 and the laboratory report, including chain-of-custody documentation, is provided as Appendix A.

Prior to collecting a groundwater sample from monitoring wells, the well was purged until pH, conductivity, and temperature levels stabilized. Approximately three well casing volumes were purged from the well. Purging and sampling were performed using disposable bailers. The numbers and types of sample containers used for each sample collected were in accordance with the analytical laboratory requirements and EPA protocol. All sample bottles were pre-cleaned by the supplier according to EPA protocols. To prevent cross contamination of groundwater samples by the sampling equipment, all reusable sampling equipment was washed with an Alconox solution; triple rinsed with purified water, and allowed to air dry prior to each use. Sample containers were labeled with sample number, project number, date, and the initials of the person collecting the sample. A separate sample collection record was maintained for each groundwater sample collected. The samples were placed in a cooler with bagged ice immediately following collection, and remained in the cooler until refrigerated at CSS' office. STL San Francisco (STL), of Pleasanton, California, analyzed the groundwater samples collected

from the monitoring wells. The California Department of Health Services (DHS) certifies STL. Quality assurance documentation accompanied all analytical reports generated by the laboratory.

2.3 Groundwater Sample Analytical Results and Discussion

Analytical data for groundwater samples collected from groundwater monitoring wells are presented in Table 1 and shown on Figures 4. Signed laboratory analytical reports and chain-of-custody documentation are provided as Appendix A.

TPH-G was not found in any of the wells sampled this quarter except for LP-5 at 210 micrograms per liter ($\mu\text{g/l}$). TPH-D was not detected above the laboratories reporting limit of 50 $\mu\text{g/l}$ in any of the wells. BTEX compounds were not detected above the reporting limits (BTE = 0.50 $\mu\text{g/l}$, X = 1.0 $\mu\text{g/l}$) in any of the wells sampled.

MTBE was detected in groundwater from wells LP-3, LP-6 and LP-7 at 0.55 $\mu\text{g/L}$, 0.75 $\mu\text{g/L}$ and 1.0 $\mu\text{g/L}$, respectively.

3.0 SUMMARY OF ACTIVITIES FOR 2006

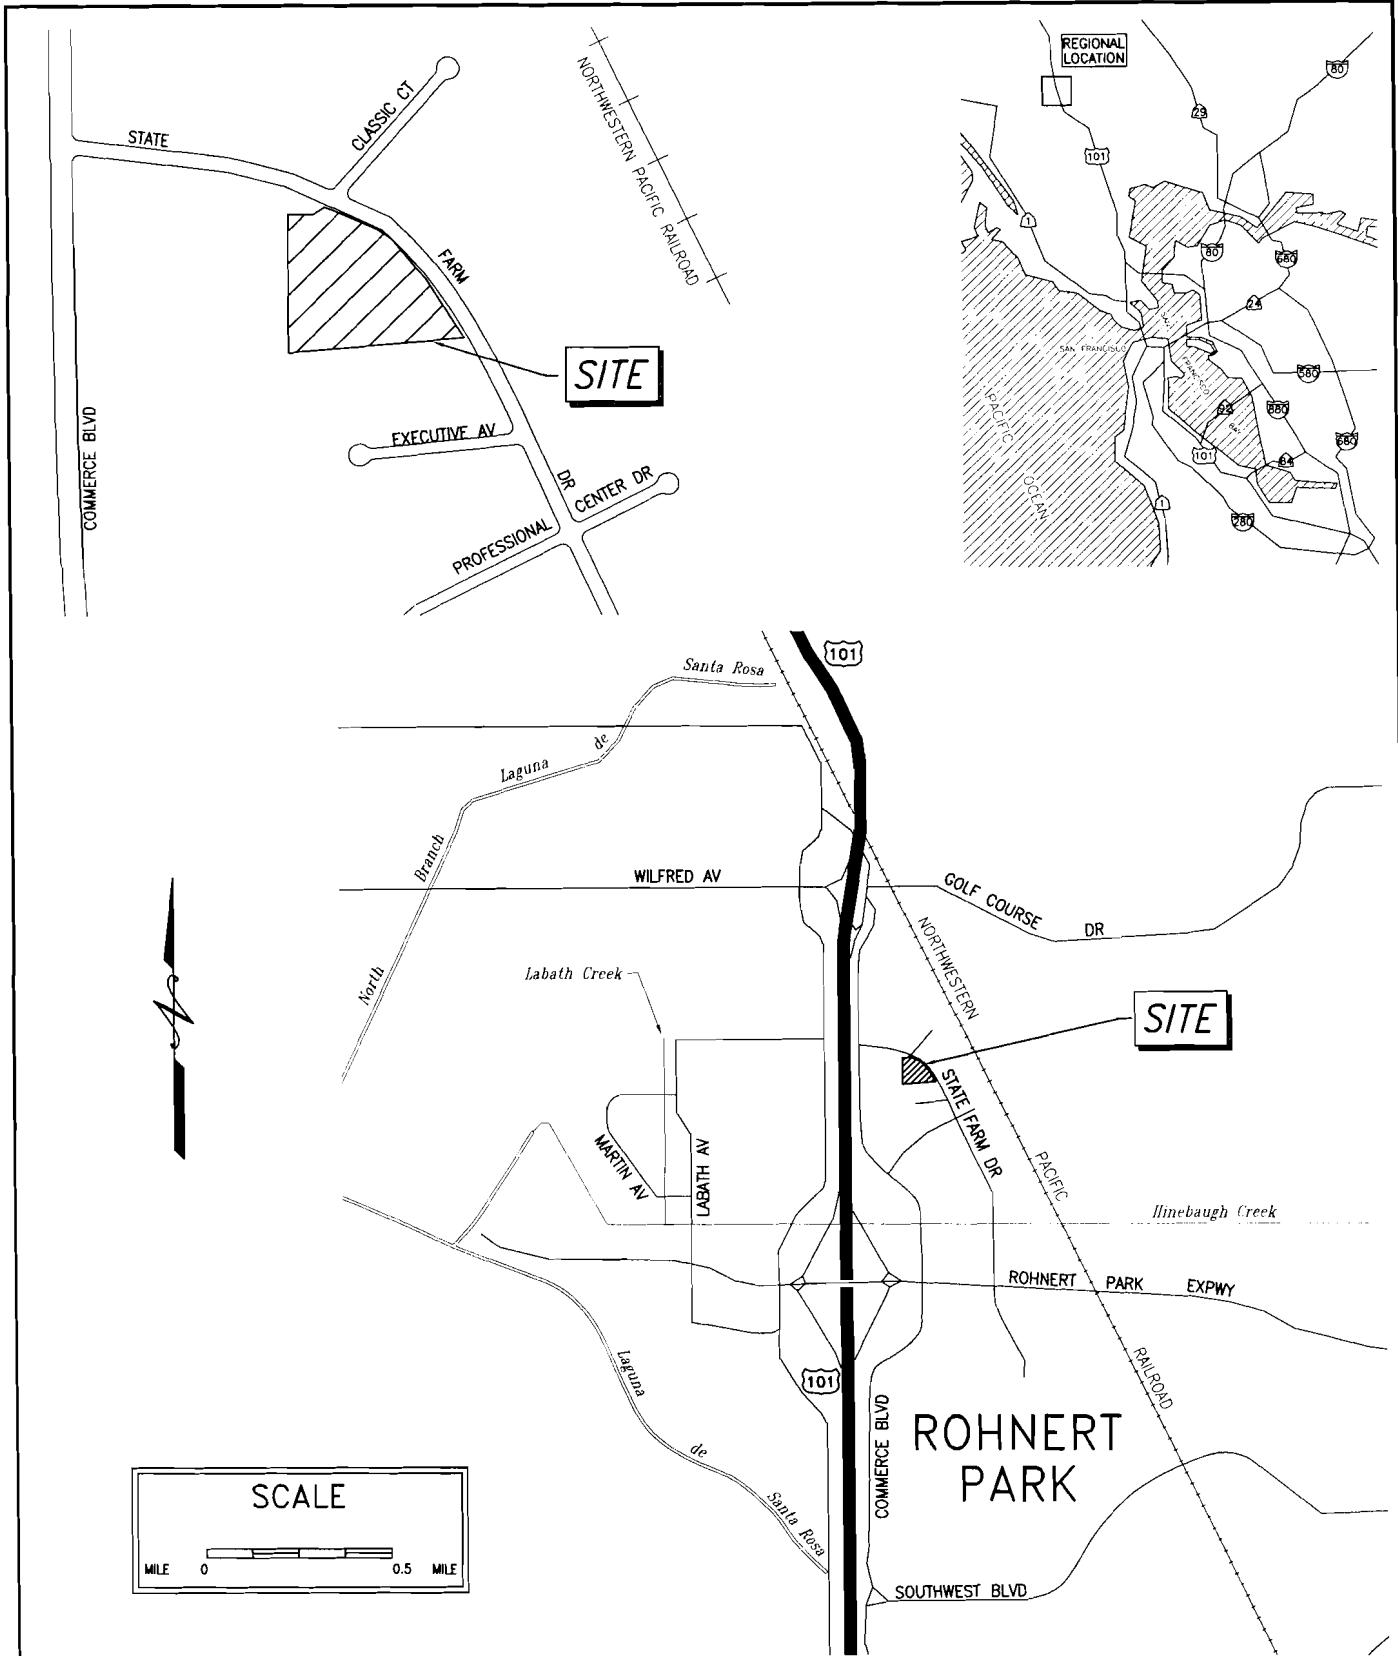

The following activities are planned for the 2006 groundwater monitoring events:

- Groundwater elevations and groundwater samples will be collected from the sites wells according to the schedule presented below. The schedule below is consistent with the SCEHD approval letter dated March 9, 2005.

Monitoring Frequency

1. First Semi-Annual 2006 (March 2006) – LP-1, 3, 4, and 5: gasoline, diesel, BTEX+MTBE.
 2. Second Semi-Annual 2006 (September 2006) – LP-1 through LP-8: gasoline, diesel, BTEX+MTBE.
- In accordance with AB 2886, CSS will provide, electronically, laboratory analytical results and necessary monitoring well information to the state.

Dear Mr. Carter,

Attached is our report for your samples received on 09/26/2005 12:40

This report has been reviewed and approved for release. Reproduction of this report is permitted only in its entirety.

Please note that any unused portion of the samples will be discarded after 11/10/2005 unless you have requested otherwise.

We appreciate the opportunity to be of service to you. If you have any questions, please call me at (925) 484-1919.

You can also contact me via email. My email address is: dsharma@stl-inc.com

Sincerely,

Dimple Sharma
Project Manager
